

स्रोतमा फोहोर छुट्याउँ । Segregate Waste at Source

Doko Recyclers is a social enterprise dedicated to managing and recycling dry waste. Our goal is to conserve resources that would otherwise be wasted because of our reliance on dumping. Simple actions like segregating waste before discarding plays a vital role in creating a sustainable future. The use of waste as a resource with increased value extraction through reuse, recovery, and recycling is a core value of our vision for sustainable waste management in Nepal.

OUR SERVICES

Recycling should be a seamless daily act and we can help you. Doko Recyclers offers a selection of services to help you recycle, conserve resources, reduce pollution and stimulate local economic growth.

Seamless Pickup

Professional, scheduled, and convenient doorstep pick up for your recyclable waste.

Waste Impact Report

Quarterly and annual Waste Impact Reports in addition to the Online Dashboard support for real time statistics and unique user accounts for each client.

Awareness Workshops

Training and environmental awareness workshops for staff who handle waste and other team members.

Responsible E-waste Management

As Nepal's first e-waste handlers we ensure that we responsibly extract resources, securely destruct data and safely dispose of hazardous materials that come from e-waste. For additional information: www.ewastenepal.com

Shredding Services

We guarantee responsible and confidential data destruction through either on or off site shredding. Once shredded, all confidential data is recycled continuing your sustainability efforts.

Fair Prices

We pay fair prices for recyclable waste based on waste categories: paper, plastic, metal, mixed waste, glass, e-waste, etc. Different categories have varying market rates.

Composting Solutions

We provide easy and simple compost solutions through our composting Smart Buckets and Vermicomposting bins to help you manage your organic waste.

Doko Bins

We offer a wide range of Doko bins from traditional weaves to heavy-duty fiber resin that allows users to segregate different types of waste: organic, paper, plastic, metals, and other recyclables.

Upcycling

Where other people see waste, we see resources that can be turned into beautiful objects. Our handcrafted collection of upcycled products are a great way to reuse, create value out of waste and bring some edge to your decor.
