

# KNOW YOUR WASTE

## Education Workshops

So you've started your waste segregation journey and you suddenly find yourself asking: Can I recycle this? How do I segregate? Which plastics are acceptable? What about broken glass? Tyres? Electronics? Wires? Textiles? Food waste? What can't be recycled and what is hard to? What is hazardous waste? What happens to everything when it's gone?

Doko Recyclers has the answers to all your waste questions in the form of our ***Doko Waste Education and Awareness Program***. We offer interactive workshops and on-site tours for a range of audiences from children to policy-makers to educate, inform, and encourage action towards improving Nepal's waste disposal practices.

Increase Environmental Awareness

Learn About Eco-friendly Lifestyle

Recycling and Waste Management

E-waste Management

We offer tailored programs for schools and colleges with the following value propositions:

### Eco-Friendly Space

### Interactive Awareness Workshops

### Materials Recovery Facility Tour

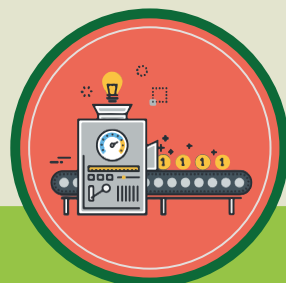

### Waste Smart Curriculum

Become an eco-friendly and sustainable space, inspiring students to learn about and participate in sustainability practices.

Hands-on workshops designed to teach about the importance of responsible waste segregation practices and the environmental benefits of recycling.

Learn about what happens to our waste once it enters the recycling stream and see how we sort by visiting our Materials Recovery Facility.

We provide schools with a curriculum on proper waste management practices that can be adapted to fit existing classroom learning processes.

Learn about the importance of **Reduce, Reuse, Repair, Rot, Refurbish & Recycle**

Learn about the **Circular Economy** and its growing importance

Check out **Tatwa** our collection of upcycled products

Participate in exciting **games and activities** to understand and enjoy recycling

See why your favorite **electronic devices** should be reused, repaired, or recycled, and learn about the impact of improper electronics disposal

Learn about the importance of **composting** and see our **worms in action**

## Interactive Workshops

### Workshop Highlights

- A brief introduction on the current scenario of waste management in Nepal and the underlying challenges.
- Learn how to 'segregate waste at source' by identifying recyclable and non-recyclable materials through hands-on games and activities.
- Learn how reducing, reusing and recycling can help save resources like trees, water, energy, etc.
- Discover the joys of composting and the science behind it.
- Learn about simple life changes you can easily adopt to make a difference at an individual level.

Group size: 30 participants

Tour duration: 1.5 hours

Location: School/college premises

Refresher workshops are also offered on request.

## Materials Recovery Facility Tour

### Tour Highlights

- Learn about the ins and outs of the local recycling industry.
- Observe how materials are sorted and processed for recycling and why various types of materials can (or cannot) be recycled.
- Watch electronics being dismantled, wires being stripped, confidential paper being shredded and other cool activities taking place at our facility.
- Let's have some fun! Play recycling games to nurture the budding environmentalist in you.
- Learn about the Circular Economy and its growing importance.

Group size: 30 participants

Tour duration: 1.5 hours

Location: Sano Thimi
